brought to you by
CODE Magazine

BEST PRACTICES FOR OPTIMIZING POWER BI AND DAX MODELING

A webinar presented by
Helen Wall and Andy Clark

Helen Wall
Linkedin instructor for
Microsoft Power BI and AWS

Andy Clark
BI Project Manager

Kicking Things Off

Jim Duffy

- Director of Business Development
CODE Magazine & Consulting
- Former Developer – Drawn to the Dark Side: Now Responsible for
Marketing & Business Development
- jduffy@codemag.com / [My Bio](#)
- International Author and Speaker
- Former Microsoft RD (Regional Director) 9 years
- Former 11 time Microsoft Most Valuable Professional (MVP)
- Twitter: @jmduffy

About CODE...

“Helping People Build Better Software”

- Custom Software Development, Training, Mentoring,...
- Web, Cloud, Mobile, Desktop, Serverless, Databases,...
- User Interface and Interaction Design
- Project Rescue, App Modernization (VB, VFP, Access, etc.)
- Development Team Staff Augmentation
- Microsoft Certified Partner

Your Ticket to Free Consulting

- Hour of CODE: One hour on us. Schedule a call today. Slots are limited.
- No strings. No commitment. No credit card required.
- Just help from our team of experience software developers.
- Got questions? Stuck on an issue? Platform and/or architecture decisions to make? We can help!

CODE Is Looking for Developers!

- Join the CODE Consulting Team!
- We have **current** openings for:
 - Senior C# Developer
 - .NET Desktop Developer
 - WPF Developer
 - SSRS Report Developer
 - REACT Developer
 - ASP.NET MVC Developer
- Details here: <https://bit.ly/3614rpY>

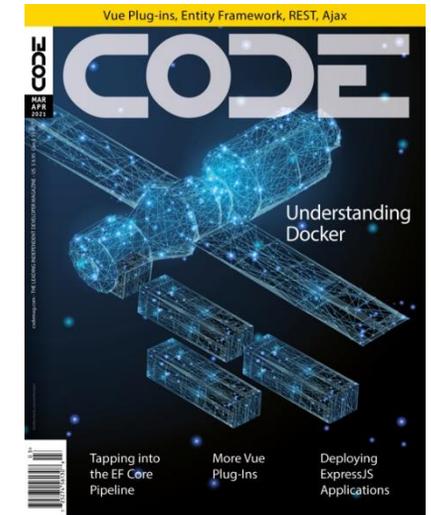

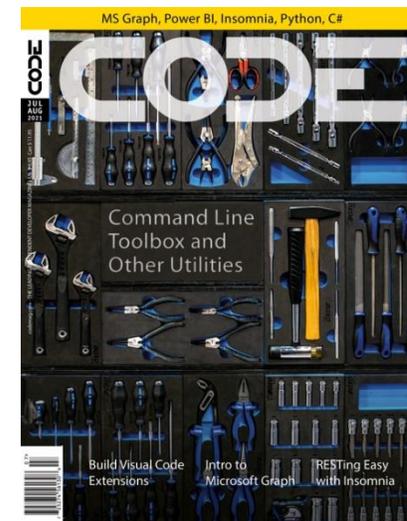

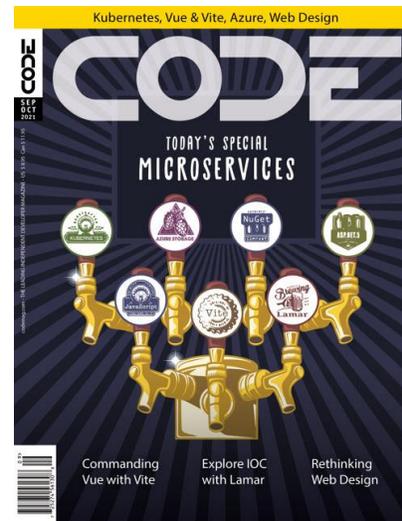

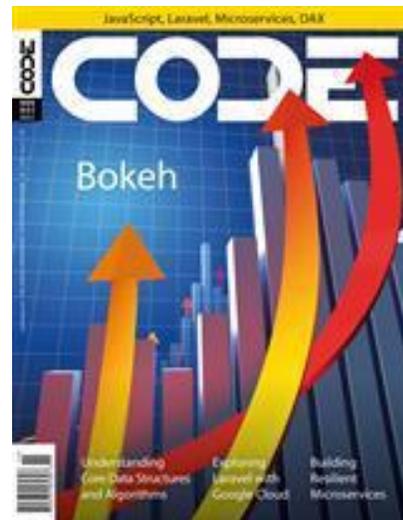

Reference Links

- We're always looking for talented developers
<https://www.codemag.com/Jobs>
- Got an idea for an article you want to write?
<https://www.codemag.com/Write>
- We can help add resources to your dev team
<https://www.codemag.com/Staffing>

Social Networks

- Subscribe to our YouTube channel: <https://tinyurl.com/CODEYTC>
- Follow us on Twitter: [@CodeMagazine](https://twitter.com/CodeMagazine) 
- Facebook: www.facebook.com/CODEMagazine/ 

Free Subscription to CODE Magazine!

- The leading software development magazine written by expert developers for developers
- All registered attendees will automatically receive a free digital subscription to CODE Magazine – no need to do anything, it'll happen auto-magically
- Please share this free subscription link with friends, social media, etc.

<https://bit.ly/35EZzXG>

CODE Magazine App

- Check out the new CODE Magazine Mobile application!
- Available for iOS & Android

<https://codemag.com/mobile>

Event Survey – Win \$100!

- Complete this very short 12 question survey for a chance at a \$100 Amazon Gift Card!

<https://bit.ly/3MC2Ho4>

- Survey must be completed by **11:59pm ET** on **Friday 03/11/2022** to be eligible!
- Completed survey is required to be eligible.

CODE Presents: Best Practices for Power BI and DAX Modeling

The survey will take just a couple of minutes to complete.

Thank you for attending! Please complete this brief 12 question survey to be eligible to win a \$100 Amazon Gift Card. Your survey must be completed by 11:59pm EDT (UTC-5) on 3/11/2022 to be eligible to win! One entry per person please. Drawing will occur and the individual winner notified by 3/18/2022.

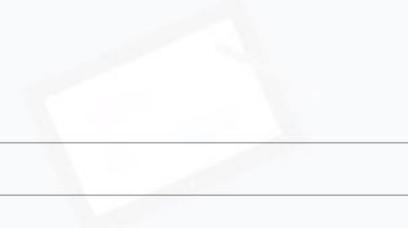

Thank you for attending! Please complete this brief survey. Yes, we still want to hear from you if you were unable to attend but watched the recording instead. :-)

* Required

1. Full Name *

2. Company Name *

...

THIS SLIDE WILL BE REPEATED AT THE END AND SURVEY LINK REPEATED IN THE CHAT WINDOW!

Photino

- Build native, cross-platform desktop apps that are lighter than light.
- Lightweight **open-source** framework for building native, cross-platform desktop applications with Web UI technology.
- Photino is maintained by the CODE Magazine team with the help of the open-source community.
- tryphotino.io

Select Date Range and Time Interval

Last 1 Months

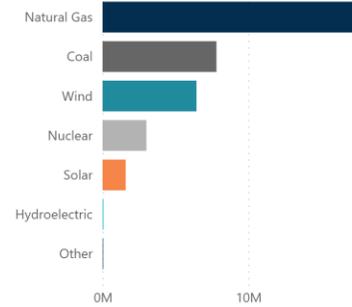

6/8/2021 - 7/7/2021

Daily **Hourly** Monthly

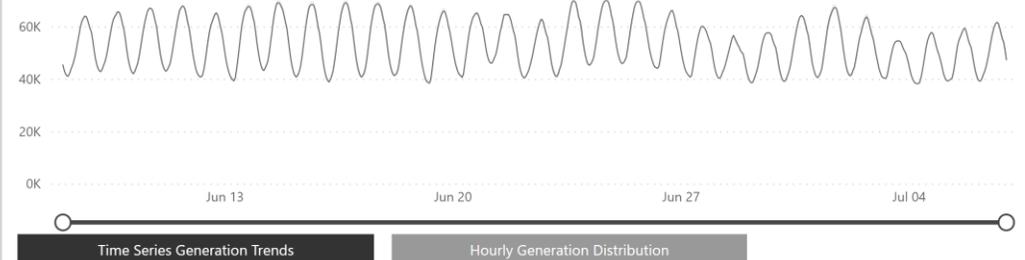

Total Electricity Generated (MW Hours)

36,929,218

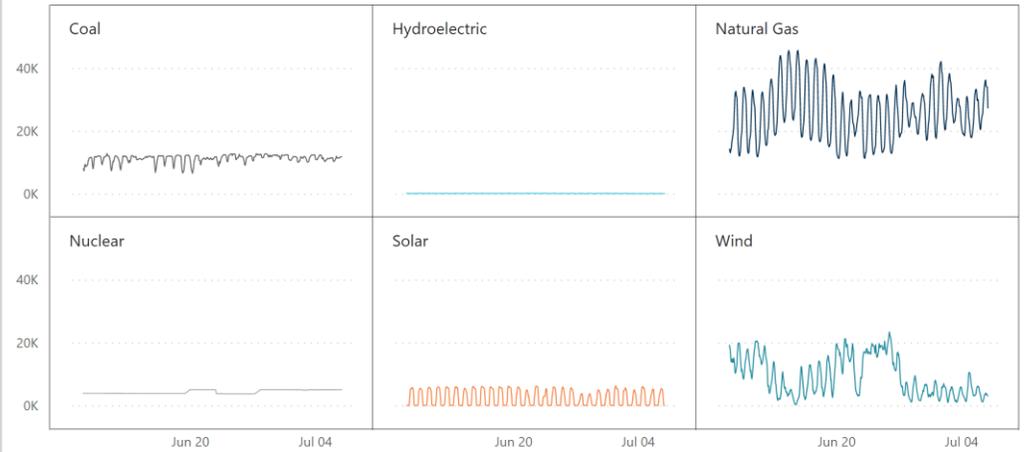

Electricity Generation: Hover over source below

Hourly Electricity Generation versus Demand: Hover over line to see hourly breakdown by energy sources

Hourly Electricity Generation by Energy Source: Hover over lines to see comparison to hourly average numbers

Select Date Range and Time Interval

Last 1 Months

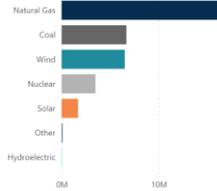

9/1/2021 - 9/30/2021

Daily **Hourly** Monthly

Total Electricity Generated (MW Hours)

35,130,406

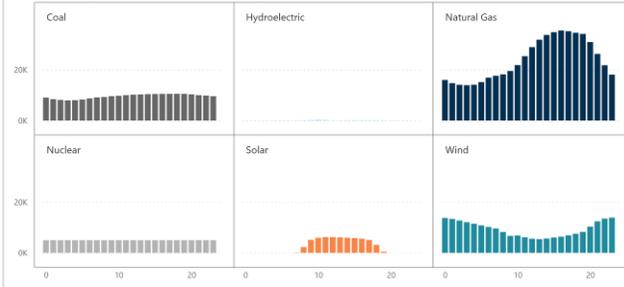

Electricity Generation: Hover over source below

Hourly Electricity Generation versus Demand: Hover over line to see hourly breakdown by energy sources

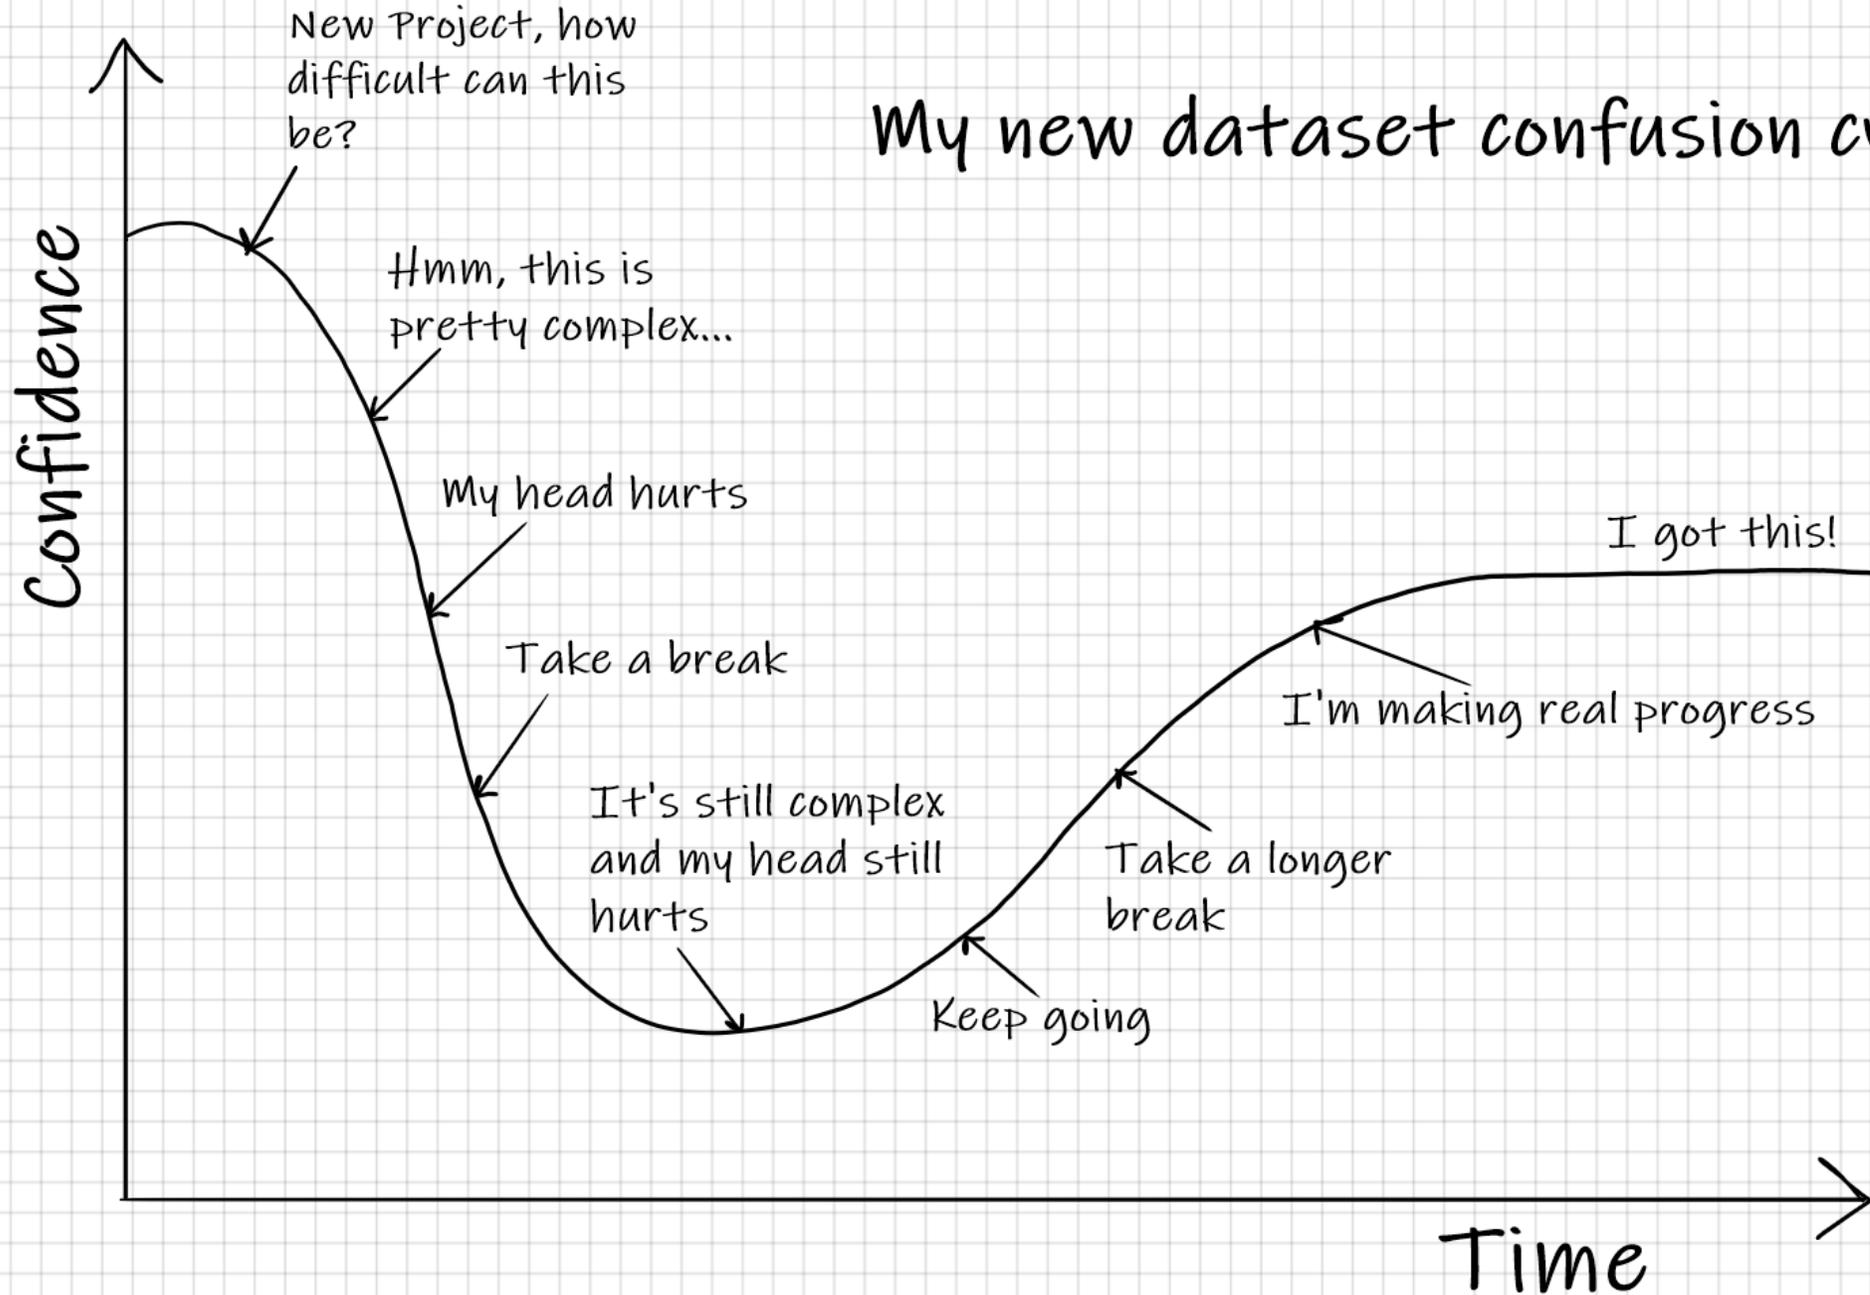

Average Electricity Generated by Hour: Hover over hourly bars to see data trend details

All the potential data for the analysis

The data we
should start with

My new dataset confusion cycle

Incorporate a model from a Python script into Power BI!

Applied Steps

- Source 
- Changed Type
- Run Python script 
- dataset
- Added Custom 
- Changed Type1

Power Query passes the 'dataset' dataframe variable into the Python script, which contains the transformed data up to that point in the query

```
# 'dataset' holds the input data for this script
from sklearn.linear_model import LogisticRegression

logit = LogisticRegression()
logit.fit(dataset[['x']], dataset['y'])
dataset['Pred'] = logit.predict(dataset[['x']])
```

After running a logistic regression model Python script, it passes the transformed 'dataset' table back into Power Query and we can drill into it

Alternatively, here's where the fields from the final table object (after running a logistic regression model with the x and y fields) that we load into Power BI Desktop come from...

 x	 y	 Pred	 Match
1	0	0	Yes
2	0	0	Yes
3	1	0	No
4	0	1	No
5	1	1	Yes

Incorporate a model from an R script into Power BI!

Applied Steps 

- Source 
- Changed Type
- Run R script 
- output
- Added Custom 
- Changed Type1

Power Query passes the 'dataset' dataframe variable into R script, which contains the transformed data up to that point

```
# 'dataset' holds the input data for this script
m <- lm(y ~ x, data = dataset)
dataset$Fit <- predict(m)
output <- dataset
```

After running the R script, it passes the transformed 'dataset' back into Power Query as the 'output' table object that we can then drill into

Alternatively, here's where the fields from the final table object that we load into Power BI Desktop come from...

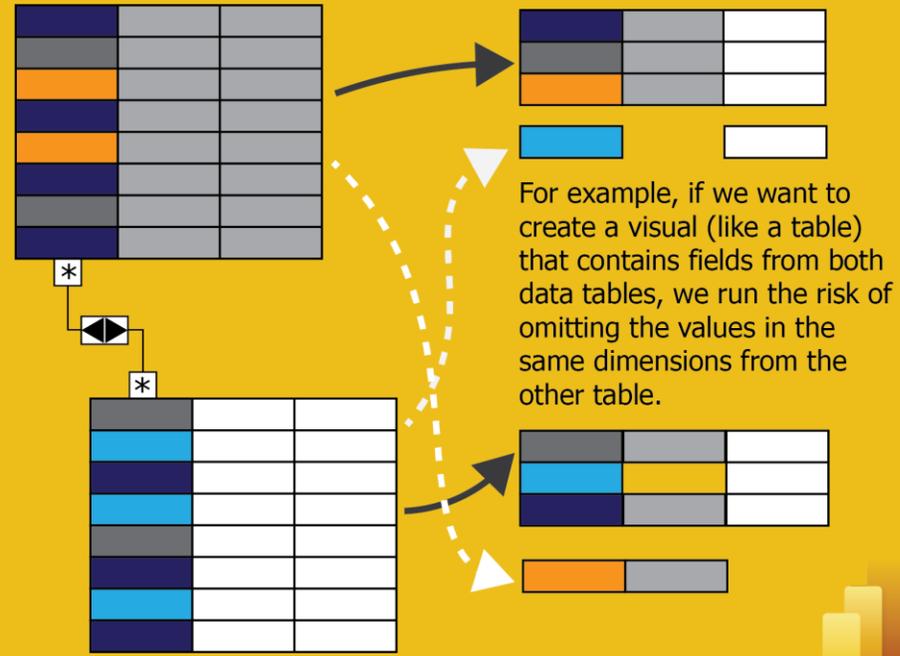

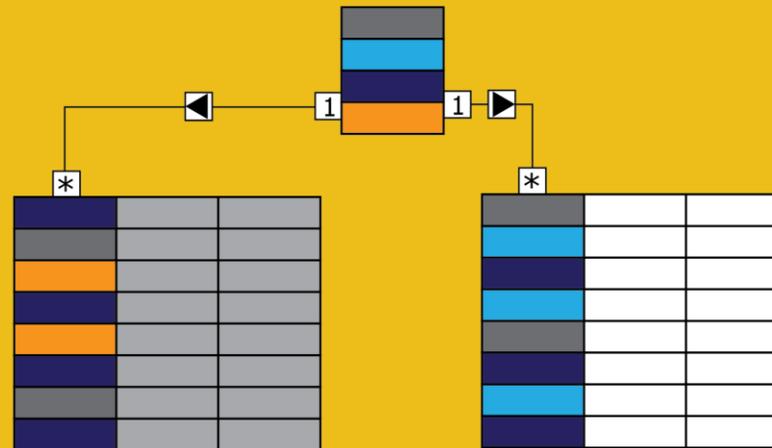

x	y	Fit	Dist
1	2.2	2.24	0.04
2	3.5	3.22	0.28
3	3.9	4.2	0.3
4	5.1	5.18	0.08
5	6.3	6.16	0.14

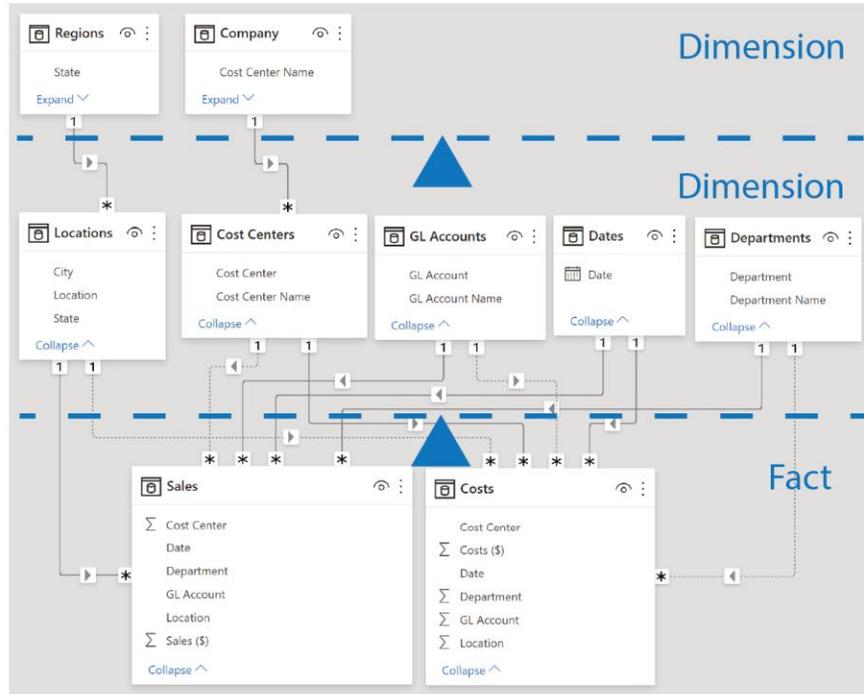

While many-to-many table joins in Power BI can fix issues that arise from connecting tables together by quickly hiding them in the model view, they can also lead to much bigger issues later when we create visuals...

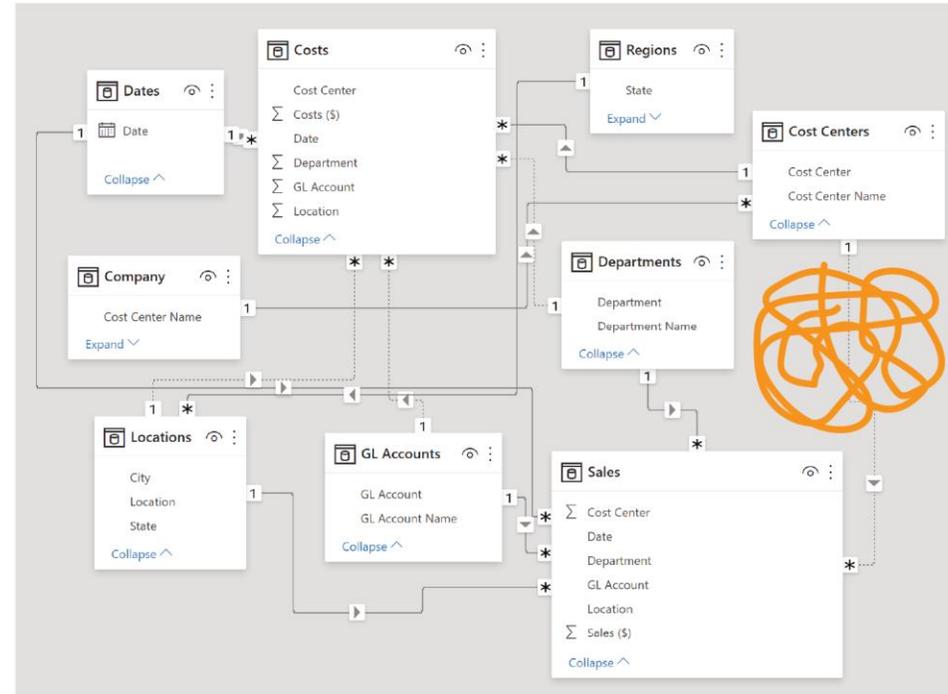

Instead, try creating a separate dimension table that serves as a key to store all these dimensions values that both tables can connect to!

Organized Star Schema

vs. Spaghetti Star Schema

We can think of date filters in DAX measures like a ruler

1. It can move the evaluation context to another date

FIRSTDATE	ENDOFYEAR	NEXTQUARTER
LASTDATE	STARTOFQUARTER	PREVIOUSQUARTER
STARTOFMONTH	ENDOFQUARTER	NEXTYEAR
ENDOFMONTH	NEXTDAY	PREVIOUSYEAR
STARTOFYEAR	PREVIOUSDAY	DATEADD

2. It can expand the existing date range coordinates

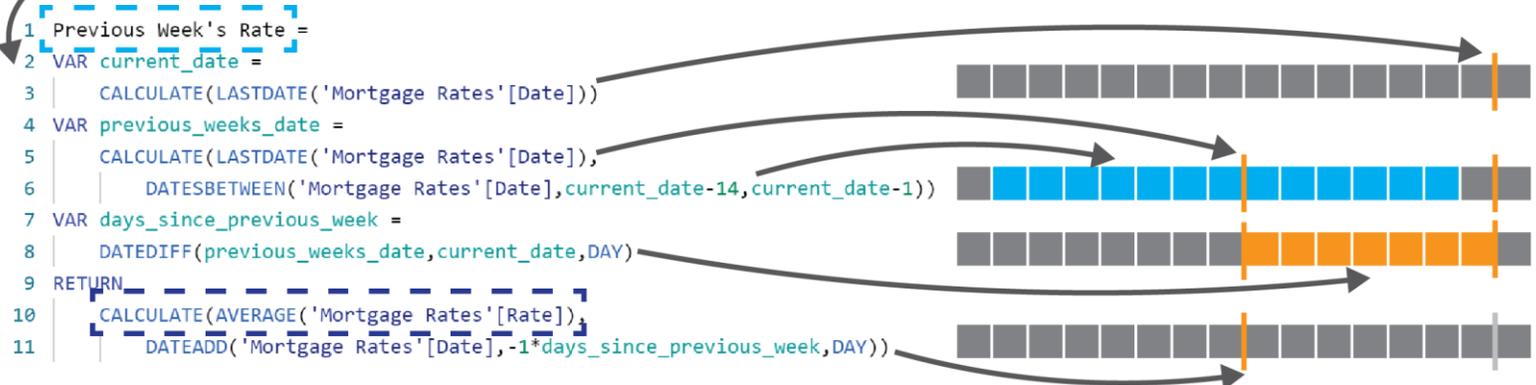

DATESMTD	TOTALMTD	DATESBETWEEN
DATESQTD	TOTALQTD	DATESINPERIOD
DATESYTD	TOTALYTD	PARALLELPERIOD

Days since previous week	Date	Rate	Previous Week's Rate
	11/7/2019	3.69%	3.78%
7	11/14/2019	3.75%	3.69%
7	11/21/2019	3.66%	3.75%
6	11/27/2019	3.68%	3.66%
8	12/5/2019	3.68%	3.68%
7	12/12/2019	3.73%	3.68%
7	12/19/2019	3.73%	3.73%
7	12/26/2019	3.74%	3.73%

High level ordered steps to creating DAX measures

1. Filter data table
2. Calculate results over this filtered data

Try this out in Power BI!

- Create measure for each value in the date dimension
- Expand date filter to previous 14 days (excluding current date), then determine most recent of these dates
- Calculate number of days between dates as a measure using DATEDIFF
- Move date filter to previous week's date using DATEADD, then calculate rate at this new date using AVERAGE

CODE Magazine as a Microsoft Benefit

As a Visual Studio Subscriptions customer, you qualify for a free, one year print and/or digital CODE Magazine subscription!

The screenshot displays the 'My Benefits' page for a Visual Studio customer. The page is titled 'Visual Studio | My Benefits' and shows the user 'Markus Egger' with a 'Sign out' option. The navigation menu includes 'Benefits', 'Downloads', 'Product Keys', 'Subscriptions', 'Support', and 'Marketplace'. The current view is 'Showing: Visual Studio Dev Essentials'. Below the navigation, there are several action buttons: 'Get started', 'Get Code', 'Sign Up', 'Use it free', 'Get Code', and 'Use it free'. The main content area is divided into two sections: 'Professional Development (4)' and 'Support (2)'. The 'Professional Development' section features four cards: 'DataCamp' (2 month subscription), 'MSDN Magazine' (Digital edition), 'CODE Magazine' (1 year digital subscription, marked as 'New'), and 'LinkedIn Learning' (1 month Premium subscription). The 'Support' section features two cards: 'Azure Community' (Forum Support) and 'Developer Community' (Forum support). A 'Feedback' button is visible on the right side of the page.
